

11th Educational Seminar

By Prof. Alan K Lefor

This seminar has been held annually since the Preparatory Office for Aizu Medical Center was launched. The memorable first seminar was held on January 29th, 2011 in the previous old hospital. Prof. Lefor is always enthusiastic about education for university students and young doctors. His style to ask simple but crucial questions has never changed. Prior to his talk, in this seminar, Dr. Hayashi (Jichi Medical University) who is an energetic gastroendoscopist, describes his experiences to demonstrate therapeutic endoscopy overseas. Both lectures will be didactic and informative! Get together in Aizu getting wintry!
